

EFFLUENT TREATMENT TRAINING COURSE

For the Food & Drink Industry

A course for those that have a key responsibility for (or interest in), effluent treatment and disposal.

The course is highly informative and practical, geared towards delegate participation and will cover a range of issues:

- *Are you currently facing an effluent discharge/treatment challenge?*
- *Are you considering modifying or installing an effluent treatment plant?*
- *Are you wondering which technology is right for you?*
- *Do you want to understand the pitfalls and the mistakes that are often made?*

Then this course is for YOU!

Course Highlights include:

- Troubleshooting– what to do when things go wrong!
- Which is the best type of plant for your wastewater?
- Design aspects for all mainstream technologies
- Gain a fundamental base knowledge on effluent treatment
- Understand the jargon– BOD, COD, FOG, Denitrification etc.
- Learn the main key treatment stages– 1^o, 2^o, 3^o
- Optimise efficiency and reduce costs
